

No direct support of multiple tabs or windows in cypress.

Remove the target attribute and then work is one way.

```
1
2 describe('Handle tabs',()=>{
3
4
5     it.skip('Appracoh1',()=>{
6
7         cy.visit('https://the-internet.herokuapp.com/windows'); // parent tab
8
9         //use invoke method.
10        //pass in removeattr and the attribute name.
11        cy.get('example >a').invoke('removeAttr','target').click(); // clicking on link
12
13        //then assertions.
14        cy.url().should('include','https://the-internet.herokuapp.com/windows/new')
15
16        cy.wait(5000);
17
18        //operations
19
20        //go back to the parent tab.
21        cy.go('back'); // back to parent tab
22
23    })
24
```

```
1 //limitation in approach 2.
2 //the base url or domain should be same as the parent tab else wont work.
3 //so child tabs and parents need to have same domain.
4 it('Approach2',()=>{
5
6     cy.visit('https://the-internet.herokuapp.com/windows'); // parent tab
7
8     //get the href attribute of the link which opens new tab.
9     //jquery function.
10    cy.get('.example >a').then((e)=>{
11 //prop to capture any property of any element.
12        let url=e.prop('href');
13 //once we get the url, use visit and pass the url.
14        cy.visit(url);
15    })
16
17    cy.url().should('include','https://the-internet.herokuapp.com/windows/new')
18
19    cy.wait(5000);
20
21    //operations
22    cy.go('back'); // back to parent tab
23
24 })
25
26 })})
```
