

```
npm i --save-dev cypress-mochawesome-reporter
```

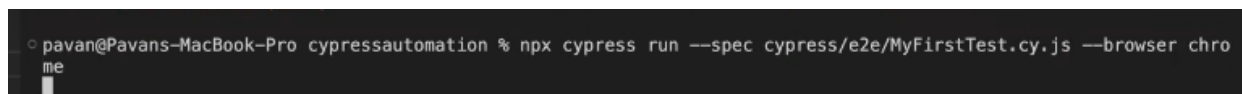

```
1
2 1) install cypress-mochawesome-reporter
3 -----
4     npm i --save-dev cypress-mochawesome-reporter
5
```

```
7 2) Change cypress reporter & setup hooks
8 -----
9
10 Edit config file (cypress.config.js by default)
11
12     const { defineConfig } = require("cypress");
13
14     module.exports = defineConfig({
15
16         reporter: 'cypress-mochawesome-reporter',    // for reports
17
18         e2e: {
19             setupNodeEvents(on, config) {
20                 // implement node event listeners here
21                 require('cypress-mochawesome-reporter/plugin')(on);    // for reports
22             },
23         },
24     });
25
```

```
26 3) Add to cypress/support/e2e.js
27
28     import 'cypress-mochawesome-reporter/register';
29
```

```
30
31 4) run cypress
32
33     npx cypress run --spec cypress\e2e\MyTest.cy.js
34
```

Run on chrome browser–

```
pavan@Pavans-MacBook-Pro cypressautomation % npx cypress run --spec cypress/e2e/MyFirstTest.cy.js --browser chrome
```

To run in headed –

```
16
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL
pavan@Pavans-MacBook-Pro cypressautomation % npx cypress run --headed --spec cypress/e2e/MyFirstTest.cy.js --browser chrome
```

Cypress config js file –

All reporters line for mochaawesome.

```
1 const { defineConfig } = require("cypress");
2
3 module.exports = defineConfig({
4   video: true,
5   screenshotsFolder: 'cypress/screenshots',
6   videosFolder: 'cypress/videos',
7   reporter: 'cypress-mochawesome-reporter', //for html reports
8   e2e: {
9     setupNodeEvents(on, config) {
10       // implement node event listeners here
11       screenshotOnRunFailure=true;
12       require('cypress-mochawesome-reporter/plugin')(on); //for html reports.
13     },
14   },
15 });
16
```

codesnap.dev

Write this in [e2e.js](#) -

```
1 //for mocha awesome reporter-  
2 import 'cypress-mochawesome-reporter/register';
```
